FourTech Van The robust all-season tyre

Viking's new and robust all-season tyre for vans and transport vehicles. Whether hot and dry summer roads or snow-covered winter streets: the FourTech Van offers high safety and excellent durability for every weather condition.

Technical highlights

High wet performance on wet roads.

Step-sipes with a prolonged edge length ensure good driving performance on wet roads and increase tyre stiffness. This results in better braking performance and precise handling in wet conditions. Wide lateral shoulder grooves effectively drain water and improving aquaplaning resistance.

Enhanced traction on snow.

Pockets in the profile trap a lot of snow and step-shaped groove edges also enhance adhesion. Resulting in better traction behaviour and strong braking performance on snowy roads.

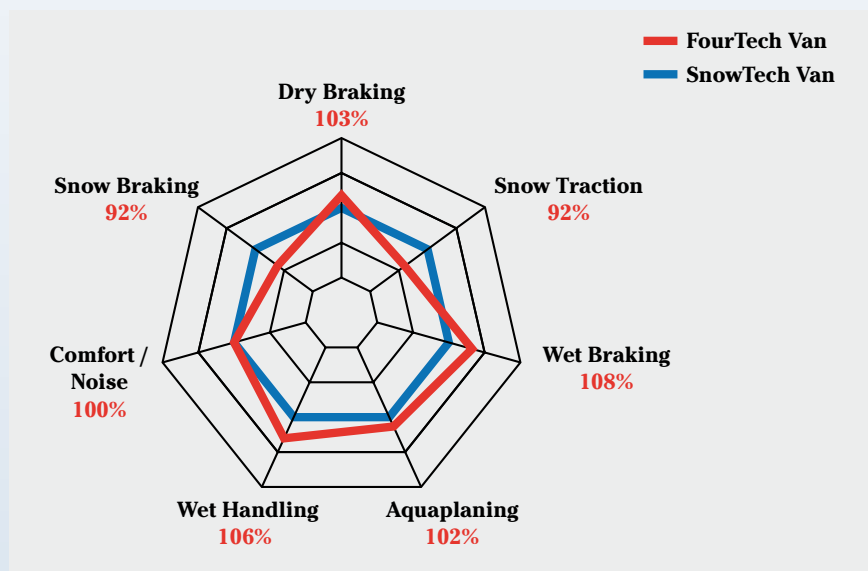

Safe cornering in all weather conditions.

The tyre offers excellent directional stability and safe cornering on dry, wet and snowy roads thanks to its ribbon structure with a tie bar in the centre. Handling ribs in the shoulder provide consistent stiffness, which has a positive effect on vehicle dynamics.
